

## **The 1% Club that Actually make a regular income from betting! And how you can join them!**

By <http://betinfo24.co.uk/>

This guide provides some really valuable information so if you want that extra edge when it comes to betting then please take 10 minutes to read through and take note. It might just be the best thing you ever do.....

Having been in this industry for many years, I have run and managed a number of successful betting services, paid and free! In that time I have come across a lot of different people and I believe I have discovered why so few people are successful at betting!

I'll give you a clue..... It's not always the result of the information they receive!!

Take this example.

One afternoon I was going through my emails as usual and I came across a really nice email from a member of the TPS ratings service, which we run. The email was basically a thank you for our winning selections that day. The member went on to say how great he felt that he had finally started to make consistent money from betting and that this was the best service he had ever joined. That particular day happened to be his best day yet, netting over £700!! He said the

ratings were pure gold and he had been working through them to tweak his strategy and now his returns were even better than when he started!

I love emails like this as it makes me feel good that our members are feeling good from the service we are providing them!!

Then.....

5 minutes later I got an email from another member of the exact same service. This member went on to tell me how sh%t the service was and how he backed all of the tips today and lost money, he went on to call me every name under the sun and requested his money back as it was the worst service ever!!

WOW!! 2 emails within 5 minutes of each other, both concerning the exact same service! Yet so contrasting!

How can one person give nothing but praise and the other person compare it to robbing their granny in broad daylight!!

Remember, they both received the exact same service, at the exact same time and both had access to the exact same information, and obviously the results of the horses were the same for both!

So how could 2 peoples opinions be so different???

Well, there lies the biggest factor when it comes to making money from betting!

People  
You  
The Punter

I can't tell you how many times I have seen this...

I've even received abusive emails when we gave a winner! Yes I know! Unbelievable.

I've received abuse (a lot) for the free service that I run. I've given winning tips throughout a week (for free) then 1 or 2 lose and some

people go ballistic, telling me that I'm a con man, I've lost them money and that I better watch my back because they will find out where I live!!

Some people are just unbelievable!

They don't realize that the 3 previous winners far outweigh the 2 losers. They don't realize that it's a free service and that I'm not putting a gun to their head and forcing them to bet on the tips.

Anyway, I have come to realize that a lot of people are like this in the betting industry because they are usually the kind of people that want everything handed to them on a plate, they want something for nothing, they want to make money fast but they have no idea how to go about it, so they think they can gamble and win....

And this just isn't the case!

I can bet you have fallen into this bracket at some point too! Have you ever joined a service or used a system, had a few bad days, cut your losses and moved on to the next big money making system?

We've all done it, and we know it gets us nowhere, yet many people continue to do it in the hope of striking gold!!

**Well here is a VERY VALUABLE lesson for you.....**

This quotation is taken from a book that I read called 'Life Leverage' by Rob Moore.

"If you have to work hard enough not to have to work hard, then for each unit of time you are in a nice or task or enterprise, the inverse relationship between time and money or results swings the other way. At the start you have to work the hardest for the lowest level, tangible result. It doesn't seem fair but time isn't fair and it is certainly not result linear. At the end you work the least, the easiest for the highest level, compounded tangible results. And that doesn't seem fair either."

This applies to almost everything, just take some successful business men, Richard Branson for example could sit on a beach for the rest of

his life and do absolutely nothing and would rake in millions! But this isn't down to pure luck! He had to work his ass off in the beginning to get to that point.

Read this next paragraph very carefully.....

“The flighty, shiny penny, get-rich-unrealistically-quick mindset is susceptibility to believing the opposite of the law compounding. It is the naïve belief that somehow somewhere you can have little to none of the front-loaded most-of-the-work-for-least-result and almost all the most-of-the-result-with-least-of-the-work, at the start. (This is the mindset of 99% of gamblers by the way)

They get attracted to something they think can short cut the law of compounding, and before they've even given the roots a chance to hold down, they give. They give up and start again and give up and start again and give up and start again, and the only things that compound are pain, misery and low self-worth. Then they get upset, blaming and complaining when it all goes wrong. (Does that sound familiar??)

Ironically, the first thing they started and then stopped may have worked if they kept at it long enough, even if it wasn't the best thing. Something done at an average level consistently will always beat something done very well for a short time and then give up on.”

I for one can hold my hands up and say I have fell in this trap many times, especially with business ventures and new projects!

I gave you this quote from the book because I wanted you to see just how much this relates to 'gamblers'.

They are always looking for the quick fix, the next big thing and the easy life.

Well let me tell you, it doesn't exist!!!

## **So How Do You Become The 1% That Actually Make Money at This Game?**

Ok, we have distinguished why most people DON'T make money from betting, so now I'm going to tell you HOW to put this right and start making a decent income.

In fact, I will show you real life examples of people that are doing just that, right now!

They are doing it because:

- 1) They have put in some time and effort at the start to find out what works for them. They didn't give up, they just worked at it until it worked for them.
- 2) They use a quality source of information that if used correctly, will source them with the ammunition they need to make money.

Where do you find this quality source of information??

You may think I'm sounding a bit biased here and maybe I am, I will be totally honest!

But I can tell you that I have come across a lot of systems and services in the past, and only a very small number have lived up to expectations.

If you don't believe me when I say TPS is the best ratings service in the country, then just take a look at the testimonial page and see what current members are saying! It's also a good sign when a service has hundreds of long standing members!

They wouldn't keep paying their monthly fee if it wasn't any good!!

<http://theprofessionalsyndicate.com>

The TPS ratings have proven to be the best ratings service in the country! They give you their top 2 rated horses for every race as well as their best bet of the day and value bets!

They also give you some profitable strategies that you can apply to the ratings to leverage your results!

**But be warned!!** If you don't put any effort in you won't get anything out! I have seen members back all selections blindly only to lose money. These are the punters with the unrealistic mindset, they give up before they have even started and move on to the next thing.

The successful members keep a record of results, they apply the strategies and they test them before placing any real bets. They find patterns and discuss their findings with other members.

Yes, they put more effort in at the beginning, but they soon reap the rewards when they find a winning strategy that works for them

The TPS ratings give plenty of winners on a daily basis, but any experienced gambler will tell you it's not advisable to back a horse in EVERY race!

When you sign up to TPS and login for the first time, you will see that I have written a 'Start Here Guide'

Make sure to read this because it explains the difference between the member who loses everything and the member who makes a tidy profit every month because he was willing to put a bit of effort in at the start!!

Fine Example of persistence.....

I know I have mentioned this before, but it's a great example of a genuine punter who turned things around and actually made over 10k profit after discarding the TPS ratings as being s!@T

*"Hi, I have been a member with you on and off for quite a long time now and I feel that the amount of e-mails you seem to be getting from disgruntled members is a little unfair. Please feel free to forward this to existing or past members should you feel the need.*

*When I first starting following your ratings I had not planned on how I was going to approach it, I did not have a strategy and as a result lost quite a bit of money over a very short space of time. Unfairly I then thought your site was s@#t and was cursing the fact you charge £35 per month and were providing appalling results.*

*I then decided to spend a few months simply monitoring your performance. I devised a spreadsheet which recorded all your first and second rated horses, the price they went off at, course, distance and an imaginary bet for each horse in each race. I would place £20 on the first rated horse, £20 on the second rated horse and then dutch (£10 on each). My idea for this was to see if either your rated 1 or rated 2 horse had more success or if it was better to dutch every race. If I didn't win then I would place £30 on the next (£15 on each if dutching), then £40, £50 and so on. When a horse won I would drop back to £20 for the next race and carry on. As this was just a test and no actual money was being spent I didn't stop betting, on some occasions I was betting £100 on a race which meant you would have needed a starting balance of well over £500.*

*My results over 3 months showed that while dutching gives your more winners overall is not very profitable. The way forward was to back just your 1st rated horse in every race (regardless of form, price, market movements etc) which is what i decided to do. As mentioned before I was to place £20 on the first race, if it wins £20 goes on the next. If it loses then £30 on the next, £40 and so on.*

*Based on the previous 3 months I new the strategy worked, yes there would be some bad days and yes there may be days when I lost a bit however I knew to stay within my limits and to persist.*

*Well the next 3 months were incredible for me, I managed to pay off some debts and also provided a stunning christmas for both myself and my family. This was all down to your ratings and for the work that I had done. During those 3 months on 8 days i made a profit of over £1000 and on 10 consecutive days I made over £300 profit. Sometimes I broke even and I also lost but I was determined to stick with it. I used profit to enhance my balance which would cover me during a bad streak.*

*The results over the last few months haven't been great but that hasn't helped with all the rain we have had over the winter so I've taken a break and will continue soon when the ground gets a little better.*

*Your members must understand that it is imperative to have a plan and stick to it, more importantly they must not be afraid to lose. I lost approximately £600 over 2 consecutive days (due to your poor ratings :o) ) but my bank was healthy due to previous good results. I new the system worked so even though I was disappointed at losing £600 I carried on with my system and had won it back a week or so later. Since August/September 2015 I have made over £10,000 profit.”*

#### *4 Simple steps to becoming the 1% of Punters that make regular profits*

- 1) Don't take any service or system at face value – When you join a new service, especially one like TPS, It's vital that you record all results yourself. Once you start recording your own results, you will start to notice patterns and trends. Once you find something, you can then start to paper trade. If the trend failed you havn't lost anything. It's vital that you paper trade using different strategies until you find the right one for you.
- 2) Time – Its important that you give each of your strategies time. 1 week is no good, 1 month is a little better, but still no good. You want to build up a few solid months of results so that you can asses them and devise your strategy from there. If the service already offers a winning strategy then a few months down the line you will know if that strategy is viable or not.
- 3) Discipline – You've heard this a lot, but to succeed at anything in life, you need discipline. If you join a new service, back the selections they give you, a couple lose so you increase your stakes hoping to win back what you lost, then you lose again, you are fuming and you wish you never joined, you feel angry and want to find a quick solution! Then you are not disciplined!!
- 4) Find the right information – As I have already mentioned, finding the right source of information is vital. TPS is the best ratings service in the country; it has hundreds of happy members. This is always a good sign when a service continues to grow year on year!!

# The Best *Ratings* Horse Racing Service

In the Country

Here is what you get when you join:

- ✓ Top 2 rated horses for every race
- ✓ Best bet of the day (60% strike rate)
- ✓ Winning strategies
- ✓ Dedicated members forum
- ✓ Secret strategy that banks £50+ per day!
- ✓ FREE NH Banker Bet System for 2016

All of this for less than **£1.50** /day  
(Less than a cup of Coffee)

➔ **JOIN TPS NOW**

I hope you have been able to take something from this free guide!

If you want to become the 1% of punters who actually make money from betting then start by sourcing good information, sign up to TPS now!!

Then apply the other 3 steps above. **Remember that there are no such things as get rich quick schemes.** The effort has to be put in at the start, you can not cheat the law of compounding!!
